McCall, Thanh Dao, Sujay Potlapelly

PROJECT DESCRIPTION

For aspiring fashionistas, who are looking to bring their outfit ideas to life, LookLoom is a shopping and fashion website that allows users to bring together vendors under a single site and mix and match clothing pieces, categorize outfits, and purchase items. LookLoom is a one stop shop for styling outfits.

TIMELINE

We found that the 4-week timeline limited how many features we were able to add to our product.

MERGE CONFLICTS

There were times when we had to restore progress due to merge conflicts and we had to take some time to reset.

OTHER COMMITMENTS

Many of us had other large projects and classes to juggle, and we had to balance this project with those commitments.

CHALLENGES

FUTURE SCOPE & ENHANCEMENTS

PULL FROM MORE VENDORS

- only Amazon at the moment

IMPROVING OUTFIT DISPLAY

- include API that projects items onto a model
- exporting images of outfits

ADD SOCIAL MEDIA ELEMENT

- view public closets
- search for outfits from other users
- follow other users' closets
- add reviews to outfits

MORE COHESIVE STYLING

- decide on more color themes, etc
